

# Surface Water Goals

## Existing Comprehensive Plan Goals

**Preserve, protect, and, where practicable, restore wetlands, shorelines, surface water, and ground water for wildlife, appropriate human use, and the maintenance of hydrological and ecological processes.**

**Manage the storm and surface water system through a combination of engineered solutions and the preservation of natural systems in order to:**

- **provide for public safety**
- **prevent property damage**
- **protect water quality**
- **preserve and enhance fish and wildlife habitat and sensitive areas**
- **maintain a hydrologic balance**

# What will the Surface Water Master Plan Do?

- **Establish overall program goals**
- **Define Level of Services (LOS) for current program**
- **Identify problem areas (where current LOS is not meeting the program goals)**
- **Identify projects and programs to solve the problems**
- **Prioritize projects and programs**
- **Determine what the City can afford**
- **Recommend an overall surface water program**

# Surface Water Problem/Project Types

***Flooding***

***Habitat***

***Landslides and Erosion***

***Water Quality***
