## City of Shoreline

### Draft Comprehensive Plan Update and Transportation, Surface Water, and Parks, Recreation and Open Space Master Plans

The goals and policies of the Draft Comprehensive Plan Update are the heart of the Comprehensive Plan and form the legal framework of the Plan. They will guide City Council, Planning Commission, and City Department decisions about development and growth over the next 20 years. Technical analyses, background information and operational information, are included in the supporting analysis sections of the Comprehensive Plan and in the draft master plans.

Proposed changes to the goals and policies are shown in the document titled, "*Proposed Goals & Policies Updates - Matrices.*" Your comments on these proposed changes are needed to identify issues that require further review or investigation. **Please be sure to include the Item # assigned to each goal or policy in the matrices.** This way, we can be sure to accurately address your comment.

**Proposed Goals & Policies Updates – Land Use**

Item #	Existing Goal/Policy	Workgroup Comments	Staff/Consultant Comments
1	Goal LU 1: To ensure that the land use pattern of the City encourages needed, diverse, and creative development, protects existing uses, safeguards the environment, reduces sprawl, promotes efficient use of land, encourages alternative modes of transportation and helps to maintain Shoreline's sense of community.	For clarity suggest updating - Goal LU 1: To ensure <del>that</del> the land use pattern of the City encourages needed, diverse, and creative development, protects existing uses, safeguards the environment, reduces sprawl, promotes efficient use of land, encourages alternative modes of transportation and helps to maintain Shoreline's sense of community.	
2	LU1: Preserve environmental quality by taking into account the land's suitability for development and directing intense development away from natural hazards and important natural resources.		
3	LU2: Encourage attractive, stable, high quality residential and commercial neighborhoods with an appropriate variety of housing, shopping, employment and services such as lawyers, doctors, and accountants.	Suggest changing to a Goal since it states what the residents of the community value and desire for the future. However a policy states what types of action should be taken in order to reach the goals of the community. Also update for clarity as follows -  LU2: Encourage attractive, stable, high quality residential and commercial neighborhoods that provide, with an appropriate variety of housing, shopping, employment and services, such as lawyers, doctors, and accountants.	
4	LU3: Assure new industrial uses are appropriately located and impacts are mitigated on surrounding uses.	Suggest deleting - redundant with LU1 LU3: Assure new industrial uses are appropriately located and impacts are mitigated on surrounding uses.
