CITY COUNCIL AGENDA ITEM

CITY OF SHORELINE, WASHINGTON

AGENDA TITLE: DEPARTMENT:	2015-2020 Draft CIP Review and Discussion Public Works
PRESENTED BY:	Tricia Juhnke, City Engineer
ACTION:	Ordinance Resolution Motion
	<u>X</u> Discussion Public Hearing

PROBLEM/ISSUE STATEMENT:

Each year, the City is required to adopt a six-year Capital Improvement Plan (CIP) to identify and approve capital projects based on projected revenues and expenditures. The adopted CIP sets the direction for staff in the development and implementation of capital projects throughout the City. The 2015-2020 CIP will be submitted to Council for review and approval in October along with the 2015 Operating Budget. At tonight's meeting, Council will be provided with the opportunity to review the draft fund summaries of the four capital funds and to provide input or changes prior to submitting the 2015-2020 CIP as part of the operating budget.

RESOURCE/FINANCIAL IMPACT:

The six-year CIP must be balanced based on reasonable assumptions of revenues and expenditures. The fund summaries provided tonight are based on the direction and priorities provided by Council in June. In addition to financial constraints, the availability of staff resources will be incorporated into the timing or scheduling of various projects.

RECOMMENDATION

No formal action is required; however, City staff is looking for feedback and confirmation on the priorities contained in the draft 2015-2020 CIP.

Approved By: City Manager **DT** City Attorney **JA**

BACKGROUND

Each year, the City is required to adopt a six-year Capital Improvement Plan (CIP). The plan is broken into four funds – General Capital, Roads Capital, Surface Water Capital and Facilities Major Maintenance. The CIP is scheduled to be adopted in November with the annual operating budget.

The CIP establishes the priorities for capital investments throughout the City. These priorities are typically identified through master plans approved by Council that address long-term needs and vision for the City. The most current master plans were all adopted in 2011 and can be found at the following links:

- Parks, Recreation and Open Space Master Plan
- Transportation Master Plan
- Surface Water Master Plan

The Council also adopts a six-year Transportation Improvement Plan (TIP), as required by law, that defines projects and priorities for transportation related projects. State law requires the TIP to be adopted by July of each year. The 2015-2020 TIP serves as a guide for establishing priorities for the CIP and can be found at the following link: <u>Transportation Improvement Plan</u>.

The Surface Water Utility is unique from the other capital funds in that it is funded almost entirely by surface water utility fees¹ and must address operating needs and capital needs with this funding. The Council has the discretion to adjust the rates of the utility as necessary to ensure adequate revenue to meet the operational and capital needs of the utility. In addition to the master plan, Surface Water has also developed the Thornton Creek Watershed Plan and the <u>Boeing Creek and Storm Creek Basin</u> <u>Plans</u>. Both of these plans identify needs and priorities within the applicable basins.

On June 16th, staff presented issues and needs for each of the four capital funds. Council provided direction on all four funds, which have been included in the development of the draft 2015-2020 CIP. The staff report for the June 16 Council meeting can be found at the following link:

http://cosweb.ci.shoreline.wa.us/uploads/attachments/cck/council/staffreports/2014/staff report061614-9a.pdf.

The Council will review and approve the CIP in conjunction with the 2015 Operating Budget this fall. The following is the list of dates for the 2015 Budget process with Council:

¹ As an enterprise or utility fund, the fees and charges collected by the utility are spent within the utility. There is no General Fund contribution to the utility. There are periodically grants specific to Surface Water as part of an annual budget.

Discussion of Preliminary 2015-2020 CIP	August 11, 2014
Discussion of Preliminary 2015 Budget and CIP	September 22, 2014
Discussion of 2015 Proposed Budget	October 13, 20, 27, 2014
Public Hearing and Discussion on Proposed 2015 Budget and 2015-2020 CIP	November 3, 2014
Public Hearing and Council Discussion on 2015 Property Tax and Revenue Sources	November 10, 2014
Adoption of 2015 Budget and 2015 CIP and Property Tax Levy	November 24, 2014

DISCUSSION

Draft fund summaries for three of the capital funds (General, Roads and Surface Water) are attached to this staff report as Attachments A-C. These fund summaries have been updated to include updated costs for existing projects and updated revenue forecasts. They have also been updated to include priorities and direction received by Council at the June 16 Council meeting. A fund summary for Facility Major Maintenance is not included in this staff report as it is funded entirely by the general fund and will be incorporated into the operating budget process.

General Capital Fund

Attachment A is the draft fund summary for the 2015-2020 General Capital Fund. The following key issues have been revised or addressed in the CIP:

Police Station

The City Hall Police Station project schedule and budget have been revised. The project is moving forward with property acquisition in 2014 but design is not anticipated to begin until late 2014/early 2015. This will push back the construction timeline, with completion projected to be in 2016/2017. The project scope and cost estimate will further be reviewed and refined once a design consultant has been selected for the project. In June, Council also requested that other needed maintenance improvements for City Hall be incorporated in the Police Station project. This will be reviewed and incorporated into the scope as part of the design process. Additional funding may be needed for this project in the future. However, the intent is to utilize additional Police seizure funds if available to fund the project.

Maintenance Facility

This project has temporarily been put on hold while uncertainties surrounding utilities are resolved. The CIP shows funding needed for site improvements needed this year, with the remaining bond funds programmed in 2016 when design is anticipated to begin. Staff anticipates additional funding will be needed for this project, largely depending upon the outcome utility acquisition and scope of the project over time. A better cost estimate will be developed before design starts in 2016.

Shoreline Veteran's Recognition

As the Council discussed at their July 28th meeting, this project has been added to the CIP for \$75,000. This project is anticipated to be funded entirely by donations.

Shoreline Pool Master Plan

As discussed in June, this project has been added in 2018. The current cost estimate for a master plan is approximately \$100,000. This estimate has been increased to \$115,000 to account for inflation over the next four years.

Field Lights and Turf Replacement

The Parks Department recently received an assessment of the current conditions of the synthetic surfaces and light conditions at Shoreline A/B, Twin Ponds and Hamlin ball fields (lights and poles only). The results of the assessment indicate poles and lighting need replacement within the next two years at an estimated cost of \$950,000 for all three fields. The synthetic surface at Shoreline A/B is now eight years old and has reached the end of the warrantee and is approaching the end of its lifespan. The synthetic surface at Twin Ponds has another two years on the warrantee, but replacement should be anticipated within a year or two of 2016. Cost estimates for the replacement of the synthetic surface at both locations is estimated at \$2 million.

The General Capital Fund currently includes \$130,000 annually in rental fees that are restricted for use in field replacement. Prior year contributions were less, given that some of the rental fees were to "restore" monies in the General Capital Fund from the cost of the turf replacement projects. Currently \$200,000 has been set aside for turf replacement. The draft CIP has incorporated the lighting and turf replacement at Shoreline A/B and the lighting upgrades at Twin Ponds. The turf replacement at Twin Ponds remains unfunded. To incorporate these two new projects, the field rental revenue directed towards the General Capital fund has been increased from \$130,000 to \$170,000 per year starting in 2015. This increase is offset by other associated revenue increases in the general fund, more specifically a recent lease agreement on a cell phone tower at Twin Ponds. Both projects also include future grant funding. Additionally, Parks staff will be identifying the opportunity to increase rental fees particularly for lights.

Echo Lake Access at N 195th Street

This project was identified by Council as an opportunity to increase public access to Echo Lake via the existing N 195th Street right-of-way, east of Aurora. Staff has reviewed the location and constraints and recommends a master plan be developed for this area. Issues that will need to be addressed through the master plan include permit issues for critical areas including the wetland buffer, grading/access to the lake, and public outreach/involvement. This effort is estimated at \$40,000-\$50,000, but is currently unfunded based on availability of funds and other priorities in the General Capital fund.

Roads Capital

Attachment B is the draft fund summary for 2015-2020 Roads Capital Fund. Based on the discussion in June, the following items have been incorporated into the CIP:

Annual Road Surface Maintenance

This project has been increased to fully allocate the available Transportation District Benefit (TBD) funds and add two grant projects. Through the Puget Sound Regional Council (PSRC), the City will receive grant funding for two system preservation projects:

- 15th Avenue NE (NE 147th to NE 155th) overlay project
- Meridian Avenue NE (NE 195th to NE 205th) overlay project

Both projects utilize TBD funds for grant match. Based on available fund balance this program was also increased by approximately \$700,000 over the six-year CIP.

Hidden Lake Bridge

This project has been revised to include repairs identified in study completed earlier this year.

145th Street Corridor Design Project

PSRC has recommended grant funding starting in 2016 to fund the design of 145th Street. This project includes approximately \$660,000 from the grant matching fund.

Bike System Implementation Project

This new project will install signage and markings to implement the bicycle implementation plan developed by the Transportation Master Plan. Primarily funded by a grant, the project utilizes approximately \$88,000 from the grant matching fund

Additional Grant Projects

Several projects have been submitted for grants but decisions on award of the grants have not been made yet. The following projects are shown in the CIP but work will not occur unless the City receives the grant:

- Echo Lake Safe Routes to School
- Ashworth Sidewalks (195th Street to 200th Street)
- NE 155th Street Sidewalk Repair

Additional Grant Match Funding

In order to continue to be successful in funding the match needed for grants, additional general fund contribution has been incorporated into the CIP. More specifically, general fund contributions of \$500,000 has been added in 2015 and \$200,000 in 2016. The following table shows both the grant match contributions, use of the match and the match remaining:

	2014	2015	2016	2017	2018	2019	2020
General fund contribution	300,000	500,000	200,000				
Grants received							
Bike system implementation			86,768				
145th Corridor Design			660,954				
Grant match balance	300,000	800,000	252,278	252,278	252,278	252,278	252,278

In addition to these projects, there are additional projects that have recently been submitted for grants or will be submitted later this month. Also, NE 175th Street is on the contingency list and expected to be funded at a later date.

Surface Water Capital

Surface Water Utility, as mentioned previously, must address operating and capital with the revenue generated primarily by surface water fees. Attachment C, the draft Surface Water Capital Fund, includes estimated operating expenditures. As the operating

budget is still being prepared and revised, these numbers are estimated and will change before the budget is submitted to Council in October. Based on the anticipated increases in operating expenditures there is little change in the Surface Water Capital fund. The fund continues with an emphasis on the Stormwater Pipe Replacement program and high priority projects identified in the adopted basin plans. The plan still includes \$4 million in bond revenue to fund the Stormwater Pipe Replacement Plan. Two new projects have also been added to the CIP - 10th Avenue NE Drainage Improvements and NE 148th Street Infiltration facilities. Both projects were identified as high priorities in the Thornton Creek Basin Plan.

COUNCIL GOALS ADDRESSED

The Capital Improvement Plan impacts or addresses several Council Goals, including:

- Council Goal 1: Strengthen Shoreline's Economic Base
- Council Goal 2: Improve Shoreline's utility, transportation and environmental infrastructure

RESOURCE/FINANCIAL IMPACT

The six-year CIP must be balanced based on reasonable assumptions of revenues and expenditures. Direction and feedback provided by Council tonight will be utilized to finalize the 2015-2020 CIP that will be submitted to Council as part of the Operating Budget in October.

In addition to financial constraints, the availability of staff resources directly influences the timing or scheduling of various projects. The 2014 budget included an additional Project Manager specifically to support the Surface Water Utility capital projects and programs. As the Roads Capital Fund has increased in projects as a result of increased Real Estate Excise Tax (REET) and the success of obtaining grants, there are limitations to resources for project management, design, and construction management and inspection.

These resource limitations directly impact the CIP project budgets and schedules in several ways. Project schedules are delayed or adjusted in order to balance resources. Consultants are utilized for both design and construction management and inspection at a higher cost. Even with the use of consultants there are limitations to City resources and the ability to oversee and manage consultants. To the extent feasible staff is incorporating use of consultants and timing of projects in developing and submitting projects for grant funding.

RECOMMENDATION

No formal action is required; however, City staff is looking for feedback and confirmation on the priorities contained in the draft 2015-2020 CIP.
