CITY COUNCIL AGENDA ITEM

CITY OF SHORELINE, WASHINGTON

Adoption of Ordinance No. 377, Amending the 2005 Budget for AGENDA TITLE:

Uncompleted 2004 Capital and Operating Projects and Increasing

Appropriations in the 2005 Budget

Finance DEPARTMENT:

Debbie Tarry, Finance Director PRESENTED BY:

PROBLEM/ISSUE STATEMENT:

In July 2004, as part of the 2005 budget development, departments projected their actual year end expenditures for year 2004. The actual year end results differ somewhat from those projections, as some projects that were in progress in year 2004 are actually going to be completed in year 2005. This results in year 2004 expenditures being less than projected and the 2004 ending fund balance being greater than projected. This is true for both capital and operating projects. In order to provide adequate budget resources to complete the projects initiated in 2004, additional budget authorization is needed for 2005. This is accomplished by re-appropriating a portion of the 2004 ending fund balance for expenditures in 2005.

In addition to re-appropriating monies not spent in 2004, Ordinance No. 377 amends the 2005 budget to provide budget authority to do the following projects:

- Manage in-house the capital portion of the Community Development Block Grant to provide funding for minor home repair and curb ramp installation increasing the Human Services contract budget by \$40,000 and the Curb Ramp capital project by \$150,000.
- Increase the funding for the City's recycling program by \$10,000 as a result of additional grant funds from the Local Hazardous Waste Management Program.
- Add two new Emergency Management grants totaling \$52,955 to be used to purchase equipment.
- Appropriate \$193,995 for the Public Arts Fund based on the City's policy for allocating monies for Public Art.
- Appropriating \$750,000 received as part of the Brightwater project mitigation agreement with King County.
- Increasing the project budget for the Interurban Trail Pedestrian Crossing as a result of receiving \$496,000 in grant funds from the Washington State Department of Transportation through the Target Zero program.

ALTERNATIVES ANALYZED: Alternative 1: Take no action. If the Council chose not to approve this budget amendment either the projects that were initiated in 2004 would not be completed or to complete the projects, monies that were budgeted for 2005 programs would need to be redirected for the completion of projects already in progress. In the case of capital projects, there would not be sufficient budget authority to complete ongoing projects. For those projects that are not part of the reappropriation process, there would not be budget authority to proceed with the projects.

Alternative 2: Approve Ordinance No. 377 (Recommended)

Approval of ordinance No. 377 will provide the budget authority for the completion of projects that were initiated in 2004 without negatively impacting the programs and projects that are to be provided in year 2005. Also the budget amendment will result in accurately reflecting the anticipated expenditures in the City's operating and capital funds.

The following tables summarize the budget amendment request for each of the affected City funds and the impact that this has on the City's reserve levels.

RECOMMENDATION

Staff recommends that Council approve Ordinance No. 377, amending the 2005 budget.

Approved By:

city Manager City Attorne

INTRODUCTION

Annually the City reviews the financial results of the prior year and identifies any expenditures that were anticipated to occur in the previous year, but which will actually occur in the current year. We have completed our review of the 2004 activity and have identified nearly \$6.9 million of 2004 expenditures that will actually occur in 2005. Since the expenditures did not occur in 2004, the City started 2005 with fund balance in excess of projections. These expenditures were not included in the 2005 Budget adopted by the City Council in November 2004, and therefore staff recommends the 2005 budget be amended to provide adequate budget authority for the expenditures in 2005. In most cases the funding source is from fund balance.

There are also some operating programs and capital projects that have received grants and other funding that was not included in the original 2005 budget. These projects are included as a budget amendment in Ordinance 377.

BACKGROUND

Re-appropriations

It is often difficult to fully project the status of a project. In some cases, projects are initiated in one year, but do not get completed until the following year. This is not always known when planning the next budget cycle and therefore the unexpended funds from one year become part of the fund balance carried into the next year. It is necessary to take the portion of the fund balance actually needed to complete the projects and re-appropriate those dollars for expenditure.

There are projects that were not completed in 2004 as projected, and a resulting underexpenditure occurred in both operating and capital funds. The proposed ordinance reappropriates available fund balances from these funds to complete these projects. The following table summarizes the re-appropriation request for each affected fund.

Budget Amendment and CIP Revision

Ordinance No. 377 also includes items that are not considered re-appropriations, but rather are amendments to the 2005 budget. These items have either received funding through new grant awards or other sources.

The items included in Ordinance No. 377 that are budget amendments include the following:

Minor Home Repair Program/Curb Ramp: The City will be allocating \$40,000 of its Community Development Block Grant Capital entitlement to provide funding for a minor home repair program and \$150,000 will be used to enhance the City's 2005 Curb Ramp program. These two projects were approved during the normal CDBG allocation process in September of 2004.

Recycling Program: The City has received \$10,000 in additional grant funds through the Local Hazardous Waste Management Program. The budget amendment provides authorization to use these dollars for producing recycling educational materials and support recycling events.

Emergency Management Planning Program: The City has received an Emergency Management Performance grant totaling \$17,955 and a FFY04 Supplemental Homeland Security Grant totaling approximately \$35,000. These grants will be used to purchase additional equipment to increase the level of the City's emergency readiness.

Public Arts Fund: Appropriations for expenditures related to the Public Arts Fund were not included in the 2005 budget since the projects had yet to be defined. Some of those projects have been reviewed and approved by the Parks Board and therefore we have included budget appropriation for the projects as part of this amendment. The programs allocated at this time total \$193,995. Art will be designed and installed at the Spartan Gym, Interurban Trail, Aurora Corridor and North City Business District. During 2003

and 2004, capital projects contributed a total of \$60,545 into the Public Arts Fund. The 2005 budget already includes project contributions totaling \$344,978. These contributions will be used to support the additional appropriation.

Revisions to the current 2005 – 2010 Capital Improvement Plan include:

Brightwater Mitigation: In September 2004 the City signed an agreement with King County that provided \$750,000 in mitigation funds for community park improvements or acquisitions in to the Richmond Beach area.

Interurban Trail Pedestrian Crossing: The City has been awarded approximately \$496,000 of Federal Highway Administration Discretionary Funds. This grant award will bring the total current funding to approximately \$4.2 million. The anticipated cost for the base project is \$4.1 million, with additives, the total costs to complete the pedestrian crossing has been identified to be approximately \$4.8 million.

ALTERNATIVES ANALYSIS

Alternative 1: Take no action.

If the Council chose not to approve this budget amendment either the projects that were initiated in 2004 would not be completed or to complete the projects, monies that were budgeted for 2005 programs would need to be redirected for the completion of projects already in progress. For those projects that are not part of the re-appropriation process. there would not be budget authority to proceed with the projects.

Alternative 2: Approve Ordinance No. 377 (Recommended)

Approval of ordinance No. 377 will provide the budget authority for the completion of projects that were initiated in 2004 without negatively impacting the programs and projects that are to be provided in year 2005. Also the budget amendment will result in accurately reflecting the anticipated expenditures in the City's operating and capital funds.
