Real Estate Excise Tax	▲ POSITIVE ▲	Page 20

Key to revenue trend indicators:

- ▲ POSITIVE ▲ = Positive variance of >+2% compared to projections.
- ◀NEUTRAL▶ = Variance of -1% to +2% compared to projections.
- WARNING ● = Negative variance of -1% to -4% compared to projections.
- ▼ NEGATIVE ▼ = Negative variance of >-4% compared to projections.

- General fund receipts are 2% higher than the year-ago level and expenditures are 2.5% lower than the year-ago level primarily due timing of payments for the police services contract with King County. We are projecting that our ending fund balance will be 3.1% above our original budget estimate. (See pages 3-13 for details).
- Street fund receipts and expenditures are lower than 2014 due to changes in the transfers to the general fund and the shift of intergovernmental expenditures to the general fund. This adjustment reduced the amount that the general fund transfers to the street fund; however, fuel tax receipts are 2.5%, higher than the year-ago level. (See page 15 for details).
- Surface water utility (SWM) fund receipts are 22.4% less than the year-ago level due to a timing issue that will be resolved with future distributions. SWM fund expenditures are 7.4% higher than the year-ago level and in line with budget projections. (See page 16 for details).
- Real estate excise tax receipts through September are 48.8%, higher than the year-ago level due to the strong real estate market and multiple turnovers of a large commercial property this year. (See page 20 for details).

2015 v. 2014 Third Quarter \$ Variance		\$446,900
2015 v. 2014 Third Quarter % Variance		2.0%

Total General Fund revenue received through the third quarter of 2015 totals \$22,429,152 and reflects a year-over-year increase of \$446,900, or 2.0%, and 1.8% from our year to date budget projection. Following are highlights for the General Fund:

- Property tax receipts are 4.3% higher than those for 2014.
- Overall Utility Tax and Franchise Fee receipts are 3.0% lower than the year-ago level. The August payment from Puget Sound Energy (PSE) was received late and therefore is not reflected in this report. Another factor contributing to the year-over-year decrease is one telecommunication company's error in reporting that will result in the payments for July and August being received later this year. Staff is working with the company to correct this issue.
- Gambling tax receipts increased from the prior year by 2.9%. Pull-tab activity increased year-over-year while cardroom activity declined. The cessation of card room activity at Drift on Inn last year contributed to the decrease.
- Development revenue receipts exhibit a year-over-year decrease of 10.2% but are 0.6% lower than the revised year-to-date projection. Local development activity in 2015, in terms of the number of building permits pulled for new construction and remodels as well as their valuation in 2015, are higher than the year-ago level.
- The year-over-year change for Intergovernmental Revenue receipts is largely due to unanticipated receipts from the distribution of Liquor Excise Taxes and Marijuana Enforcement revenues.

PROPERTY TAX

2015 Current Budget		\$10,570,659
2015 Third Quarter Actual Revenue		\$5,882,853
2015 % of Current Budget Received		55.7%
2014 Current Budget		\$10,245,815
2014 Third Quarter Actual Revenue		\$5,640,499
2014 % of Current Budget Received		55.1%
2015 v. 2014 \$ Change		\$242,354
2015 v. 2014 % Change		4.3%

In addition to the budget variance noted above, Property Tax receipts are greater than the year-to-date projection by \$96,616, or 1.7%. During the first three quarters of 2015 the City has received delinquent taxes from previous years that were not factored into the budget projection.

GENERAL FUND REVENUE ANALYSIS (continued):

SALES TAX

2015 Current Budget **\$7,320,000**

2015 Projected Revenue \$7,552,351

Sales tax revenue: December - July

Sales Activity	2014	2015
December 2014	\$712,174	\$736,315
January	\$554,366	\$535,619
February	\$533,674	\$520,543
March	\$609,471	\$742,842
April	\$587,117	\$605,418
May	\$616,693	\$625,846
June	\$674,044	\$702,026
July	\$725,205	\$753,169
Year to date	\$5,012,744	\$5,221,778
\$ Change		\$209,034
% Change		4.2%

Sales tax receipts through September reflect activity from December 2014 through July 2015 totaling \$5,221,778. Collections are above the revised year-to-date projection by 3.7% and 2014 collections by 4.2%. Staff's projection does not factor in the impact of one-time activity in the Construction sector.

March receipts, as reflected above, were significantly higher than that projected due to staff detection and correction of business miscoding from prior periods.

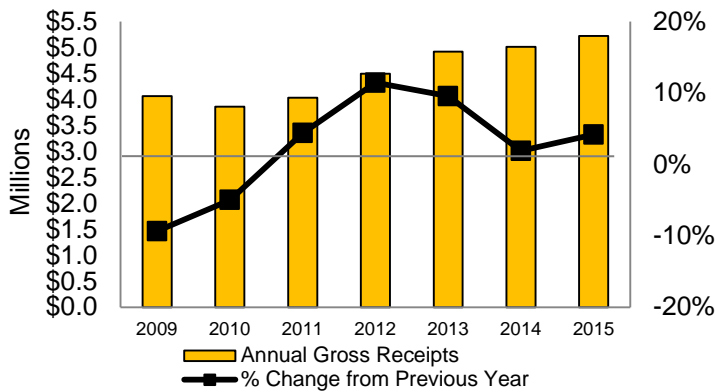

Retail trade sector receipts are higher than the revised year-to-date projection by 2.2% and the year-ago level by 7.3% fueled by continued growth in new car dealers' sales (in the motor vehicle and parts dealer category). Building material and garden category also had a significantly higher level of activity (+18.5%) and general merchandise stores category had a more modest increase (+3.2%). Activity in almost all of the other categories is also higher compared to the prior two years.

Receipts from the construction sector are higher than the revised year-to-date projection by 14.5% but lower than the year-ago level by 5.2%. Of the amount collected through September, one-time activity accounted for \$17,286, or 2.5%, in 2015, \$111,687, or 15.3%, in 2014, \$402,424, or 45.0%, in 2013 and \$462,893, or 59.7%, in 2012. One-time projects that have been tracked through this report for the last few years have come to a close. Removing one-time activity from the calculation reveals a year-over-year increase of 9.1%.

The tables on the following page help illustrate the performance of various sectors. The first table presents a condensed view of the four primary categories of construction, retail trade, hotels and restaurants, and all others. The second table presents a breakdown of the retail trade category and highlights specific industry economic performance in comparison to previous years.

2014 % of Current Budget Received		76.5%
2015 v. 2014 \$ Change		\$82,813
2015 v. 2014 % Change		8.8%

Local Criminal Justice Sales Tax receipts through September are 8.8%, more than the year-ago level. Thus far this year 79.9% of the amount budgeted has been received as compared to 76.5% received during the same period last year. In addition to the prior year variance, receipts are \$23,756, or 2.4%, more than the revised year-to-date projection.

The result for Local Criminal Justice Sales Tax receipts is not commensurate with the result for Sales Tax receipts because the distribution of Local Criminal Justice Sales Tax is based on the city's population and the amount of sales tax collected throughout all of King County.

Intergovernmental revenue sources are comprised primarily of funding for criminal justice programs, liquor excise tax, and liquor board profits. Receipts through September, in the amount of \$601,759, are 2.7%, more than the year-ago level. In addition to the prior year variance, receipts are \$16,138, or 2.8%, more than the revised year-to-date projection. Both differences are largely due to unanticipated receipts from the distribution of liquor excise taxes and marijuana enforcement revenues.

Staff revised the year-end estimate through the 2016 budget process to bring the projections in line with historical trends. As can be seen in the chart below receipts in the first quarter of 2015 were lower than those received during the same period of the last two years but have since come in near the 5-year average. It is important to note that activity through the third quarter presented in this report does not reflect August and September payments as those items are typically received in the fourth quarter.

Gambling tax receipts presented in this report largely reflect only those taxes calculated on first and second quarter gambling activity as third quarter gambling tax returns are not due to the City until October 31. Card rooms pay ten percent of gross yearly receipts over \$10,000.

Receipts attributable to taxes on gambling activity reported through the third quarter, in the amount of \$796,164 are 2.9% higher than the year-ago level and 0.7% higher than the budget projection. Total receipts, inclusive of taxes on gambling activity and payments on promissory notes, in the amount of \$799,020, are lower than 2014 collections due to the cessation of card room activity at a casino and payoff of promissory notes.

Pull-tab activity increased year-over-year while cardroom activity declined. Pull-tab activity returned to historic levels in the second quarter of 2014 while card room activity has not recovered after the closure of two establishments since 2010 and cessation of activity at the Drift on Inn. The chart below exhibits the last seven years of gross receipts reported by card rooms in Shoreline.

2015 v. 2014 % Change	-3.0%

Overall Utility Tax and Franchise Fee receipts are 3.0% lower than the year-ago level. The August payment from Puget Sound Energy (PSE) was received late and therefore is not reflected in this report. Another factor contributing to the year-over-year decrease is one telecommunication company's error in reporting that will result in the payments for July and August being received later this year. Staff is working with the company to correct this issue.

Staff has revised the year-end estimates for Cable TV and Telecommunications categories through the 2016 budget process. In addition to the year-over-year change receipts are 2.0% lower than the revised year-to-date projection. Had the PSE payment and two months' worth of payments from the telecommunications company been received on time receipts would be 1.5% lower than the year-ago level and 0.5% lower than the revised year-to-date projection.

Natural gas tax receipts are 14.9% lower than those collected during the same period in 2014. Again had the August payment from Puget Sound Energy been received on time receipts would be 10.2% lower than the year-ago level. Lower monthly payments point to reduced demand for natural gas perhaps due to a mild winter and spring. Garbage tax receipts are 2.1% higher than those collected during the same period in 2014. Cable television tax receipts are 7.3% higher than those collected during the same period in 2014. Telecommunications tax receipts are 14.1% lower than the year-ago level. Again had the telecommunication company's two months' worth of payments been received on time, would be 10.5% lower than the year-ago level. Outside of the timing issues, we have seen a steady decrease in this category over the past few years. Water franchise fee receipts are 6.5% higher than those collected during the same period in 2014.

It is important to note that activity through the third quarter of 2015 and 2014 presented in this report does not reflect third quarter payments for the garbage utility tax and water and cable franchise fees. Third quarter payments for these items are typically received in late October.

Development revenue receipts exhibit a year-over-year decrease of 10.2% but are 0.6% lower than the revised year-to-date projection. Local development activity in 2015, in terms of the number of building permits pulled for new construction and remodels as well as their valuation in 2015 are higher than the year-ago level.

Valuation of 235 building permits for new construction and remodels issued through September totals \$46.3 million and is comprised 39.2% of residential and 60.8% commercial / multi-family valuation. The majority of the commercial / multi-family valuation is for the Centerpointe Apartments, which includes 163 units valued at \$21.7 million.

Thus far in 2015, there have been 16 more permits issued for new single-family residences issued, with a value that is \$0.9 million less, as compared to the year-ago level. There have been 12 fewer permits issued for commercial / multi-family construction (new and remodels), with a value that is \$11.7 million more, than the year-ago level.

General Fund departmental expenditures through the third quarter of 2015, in the amount of \$21,913,345, are \$1,920,876, or 9.6%, higher than the year-ago level. This is largely due to the timing of billing from King County Sheriff's Office for the police contract. In 2014, the invoice for the month of July totaling \$874,894 was not received and paid until September. Had that invoice been received on time, 2015 would be \$1,045,982, or 5.0%, higher than the year-ago level. General Fund transfers out, of \$994,602 are \$1,367,960, or 57.9%, lower than the year-ago level. There were two significant one-time transfers that occurred during 2014 totaling \$800,000: \$300,000 for a grant matching pool and \$500,000 to support the annual roads surface maintenance program. Additional funding for debt service was also transferred earlier in the year in 2014 than it has been in 2015.

In addition to the year-over-year change, General Fund departmental expenditures are \$354,406, or 1.6%, less than the year-to-date projection. This is mostly from salary and benefit savings due to position vacancies. Expenditures including transfers out are 1.5% below the year-to-date projection.

2015 v. 2014 % Variance	-38.8%	-28.4%

Receipts, including transfers in, through September totaled \$1,068,213 and are \$675,818, or 38.8%, lower than the year-ago level. This is mainly attributed to the decrease of General Fund support to the Street Fund (through a transfer from General Fund) the movement of intergovernmental professional services from the Street Fund to another program and a transfer in 2014 from the General Fund to Street Fund to cover one-time Supplementals. There was also a credit for streetlights in 2014. The streetlights credit was later transferred to General Fund in the fourth quarter of 2014. Factoring out the above, the 2015 receipts through the third quarter were \$6,898, or 0.6%, lower than the 2014 level. Motor vehicle fuel tax revenue receipts for the third quarter of 2015 are \$883,974, 2.5%, more than the year-ago level.

Expenditures, including transfers out, through September totaled \$959,517 and are \$380,873, or 28.4%, less than the year-ago level. The decrease in expenditures is primarily because intergovernmental professional services with King County were moved to another program in 2015. Through the third quarter, 2015 expenditures are 11.8% below projections based on three-year averages. However, previous years include the intergovernmental professional services provided by King County, which are no longer included in this fund.

The Surface Water Utility Fund (SWM) includes on-going operational programs and capital projects with both being reflected in the total expenditures and revenues for the fund.

Receipts through September, in the amount of \$1,576,364, are \$453,914, or 22.4%, lower than the year-ago level. SWM ongoing revenues include storm drainage fees and investment interest earnings. Storm Drainage Fees totaled \$1,541,214 and are \$422,877, or 21.5%, below the year-ago level. Staff has reviewed the storm drainage fee distribution from the County, and believes that the lower distribution is a timing issue and will be addressed with future distributions. Staff will continue to monitor.

Expenditures, including transfers out, through September totaled \$3,116,066 and are \$215,454, or 7.4%, more than the year-ago level. Expenditures are impacted by the timing of construction schedules.

Receipts through September, in the amount of \$1,295,013, are \$481,252, or 59.1%, more than the year-ago level. This increase is mainly attributed to an increase in REET (please see Real Estate Excise Tax (REET) section). Investment earnings totaled \$1,995 which is \$4, or 0.2%, below the 2014 levels.

Expenditures through September, including transfers out, totaled \$1,460,370 and are \$58,434, or 3.8%, less than the same period in 2014. Expenditures are impacted by the timing of construction schedules.

Real Estate Excise Tax (REET) revenue receipts through September totaled \$2,173,900 and are \$712,994, or 48.8%, more than receipts for the same period in 2014. There were 209, or 30.8%, more real estate transactions through the third quarter of 2015 than in the same period of 2014, and the total value of all transactions was \$426.2 million, or 56.2%, more than in 2014.

The difference in the value of real estate transactions is attributable to: (i) there being more transactions in 2015 (888 total) than in 2014 (679 total), (ii) there being 34 high-value (\$1 million or more) transactions through the third quarter of 2015, 12 more than in the same period of 2014, and (iii) the average value of transaction increased by \$78,189 in 2014 to \$480,001.

Expenditures, mostly consisting of charges for services by the Annual Road Surface Maintenance program, totaled \$332,500, which is \$301,840 or 47.6% less than the same period in 2014. The difference between the years is mainly due to timing of the transfers to the Roads Capital Fund.

INVESTMENT REPORT – Third Quarter June 30, 2015

The City's investment policy adheres to strict standards prescribed by federal law, state statutes, local ordinances, and allows the City to develop an investment model to maximize its investment returns within the primary objectives of safety and liquidity.

Our yield objectives are very important and, pursuant to policy, the basis used by the City to determine whether the market yields are being achieved is through the use of a comparable benchmark. Our benchmark has been identified as the current yield to maturity of the Washington State Local Government Investment Pool, which had been the City's primary mode of investment prior to adopting our Investment Policy. As of September 30, 2015, the City's investment portfolio, excluding the State Investment Pool, had a current weighted average rate of return of 1.0802%. This is better than the State Investment Pool's current rate of return of 0.1766%. Total investment interest earnings through September were \$69,144 which is about 59% of total budgeted 2015 investment earnings of \$118,013.

Over the past few years, we have seen interest rates decline significantly. The average yield on two year government agency bonds was 5.34% in January 2007. By the end of 2008 this rate was down to 1.1%. Rates continued to decline reaching a low of 0.39% at the end of December 2013.

We are now starting to see some recovery in interest rates as the rate at the end of June 2014 was 0.47% and at the end of September 2015 was 0.64%. The City continued to implement a ladder philosophy in its investment portfolio over the last year. With the ladder philosophy, the City adds \$1M a quarter to its investment portfolio. This resulted in the City being able to hold some securities at a higher interest rate during the current interest rate environment. For example an instrument purchased in August 2015 is yielding 1.2636% and will not mature until August 2018. This rate of return is projected to be above the average projected rate of return from the State Pool over the same period. A laddered portfolio approach helps assure that the City will, in the long run, receive a market average rate of return.

As of September 30, 2015, the City's investment portfolio had a fair value of nearly \$27.30 million. Approximately 33% of the investment portfolio was held in U.S. government instrumentality securities, and 67% was held in the Washington State Investment Pool. The City's investment portfolio valued at cost as of September 30, 2015, was slightly over \$27.27 million. The difference between the cost and the market value of the portfolio represents either the loss or the gain of the portfolio if the City were to liquidate investments as of the day that the market value is stated. This would only be done if the City needed to generate cash. The City holds all of its investments until the scheduled maturity date, and therefore when the investments mature the principal market value should equal the cost of the investment. The City also holds sufficient investments within the State Pool to allow for immediate cash liquidation if needed. Investments within the State Pool can be liquidated on any given day with no penalty.
