SBES Program

The purpose of the *Sustainable Business Extension Service* is to promote resource conservation programs and environmentally sound business practices.

Our experience and resources can keep your business from getting bogged down in red tape.

Your company will be provided with environmentally-oriented education, technical resources, and access to money saving rebate programs.

Use SBES to enroll in money saving rebate programs, implement Best Management Practices or set up safety classes. Call our staff to ask questions about permits, regulations, hazardous materials, safety issues or contaminated property. SBES can keep you abreast of the ever-changing world of environmental and safety regulations.

Shoreline SBES is always FREE and confidential.

Services

Water and Energy Conservation

Learn about water and energy conservation programs as well as current conservation technologies. *Call or email Jason McKinney, jason@ecoss.org*

Brownfield Cleanup & Development

Let SBES provide you with technical information and assistance related to cleanup & development of your contaminated property. This includes regulatory and process requirements as well as information on obtaining complete professional services and potential government grants. *Call or email Emery Bayley, emery@ecoss.org*

Pollution Prevention Assistance

Minimize waste streams and implement environmentally sound facilities management methods. Learn about special permitting or regulations. Get informed about current stormwater and hazardous waste regulations. *Call or email Jason McKinney, Jason@ecoss.org*

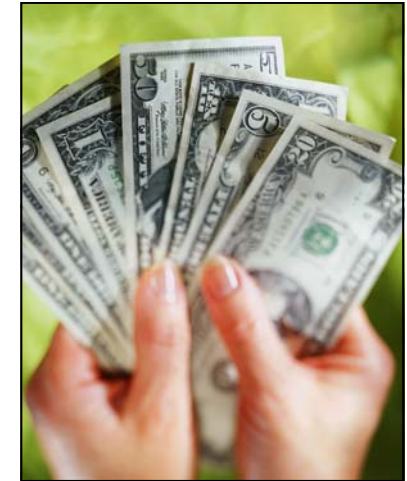

Air Quality Assessments

Improve your Indoor Air Quality to increase productivity. Get informed on current regulations and alternative motor fuels. *Call or email Jason McKinney, jason@ecoss.org*

Workplace Health & Safety

Use our self-assessment tool (the WHEEL) to help identify Health & Safety

requirements in the workplace. All Employers in the state of Washington must have a written Accident Prevention Program (WAC 296-800-100). *Call or email Al Van Schaik, al@ecoss.org*

- Save money by using rebate programs
- Stay abreast of ever-changing environmental and safety regulations.
- Incorporate the ideas of “sustainability” into your business.

Mission Statement

ECOSS is a non-profit organization working with Puget Sound businesses and neighborhoods for an environmentally responsible community.

ECOSS provides environmentally-oriented education, technical resources and other services. We serve as a voice for the community on issues that encourage a clean environment and urban redevelopment.
