Shoreline Conference Center, Shoreline Room  
18560 1st Avenue NE.

Join the City in  
developing an  
Environmental  
Sustainability  
Strategy for  
Shoreline.

For more information: Juniper Nammi at (206) 546-8805

## Shoreline Sustainability Strategy: *Building a Legacy*

One of the City of Shoreline's goals for 2007-2008 is to create an "Environmentally Sustainable Community."

This summer, the City Council approved a contract with consultant AHBL to develop an Environmental Sustainability Strategy for management and stewardship of natural resources and environmental assets. The goal is to preserve, restore and enhance Shoreline's natural resources for present and future generations.

The City has a number of programs and events already in place as well as several that are in the planning stages that support this goal. Now the City is asking residents for input to develop an overarching strategy that will include:

- Oct. 11 meeting
  - 1. Criteria for environmentally sustainable decision making;
  - 2. Define the existing and potential green infrastructure system for the City;
  - 3. Measures for tracking progress towards environmental sustainability;
- Nov. 14 meeting
  - 4. Assessment of how the City is doing so far and suggestions for improvement;
  - 5. Financial, staffing and community involvement requirements of implementing the strategy.

For more information about Shoreline's Environmental Sustainability Strategy, visit [www.cityofshoreline.com](http://www.cityofshoreline.com) or call Project Manager Juniper Nammi at (206) 546-8805.
