

PROJECT LIFESAVER

An additional recovery program called **Project Lifesaver**, is offered by King County Sheriff's Office Search & Rescue Association.

This is an electronic monitoring program that provides for electronic tracking and location via a one ounce bracelet that emits a radio signal 24 hours a day.

For more information on Project Lifesaver:

KCSARA, Project Lifesaver
7300 Perimeter Rd. S. Room 143
Seattle, WA 98108

Memory Impaired Assistance Program

Shoreline Police

What you need to know if you or someone you care for is Memory Impaired

Part of Shoreline Police Department's Senior Interaction Group Program

Memory Impaired Assistance Program

Looking out for one another

It is estimated that 59% of people with Alzheimer's disease will wander and become lost. Other conditions such as Down Syndrome, Autism, Prader-Willi or traumatic brain injury can also create a tendency to wander or become lost.

Shoreline Police offers a *free* program to assist in the recovery of memory impaired persons who are lost or have wandered away from their residences or caregivers.

Latex-free, soft vinyl, snap closure.

HOW TO REGISTER

1. Call one of the Shoreline Police Department Neighborhood Centers:
West (206) 546-3636
East (206) 363-8424
Ask to register for the *Memory Impaired Assistance Program*.
2. A trained volunteer will arrange a time to meet with you and the memory impaired person at your location. A digital photo will be taken (both face and full length).
3. Complete the registration form (you will be called to update this every six months).
4. A wristband will be placed on the registered person. On the band will be:

(ID number)
Memory Impaired Assistance Program
Shoreline Police Department
IF LOCATED, CALL 911

What happens if a person wanders away or is found?

If a memory impaired person in the program wanders away, the family/caregiver will immediately call 911 to report it. Advise the 911 call receiver that the missing person is part of the *Shoreline Memory Impaired Assistance Program* and give the ID number. The 911 call receiver will have the police dispatcher send an officer to talk to the reporting person for more detail.

If a missing person wearing the Memory Impaired Assistance Program band is found, the reporting party will call 911, identify the missing person as a participant in the program with Shoreline Police and give the 911 call receiver the band ID number.

The 911 call receiver will dispatch an officer, who will contact the found person and confirm the registration information. The caregiver/family will be notified so that they can take them home and follow-up with any appropriate non-urgent medical attention.
